

# Northern Rockies Woodworking Guild

November 30, 2018

NRWG.org

Volume 14, Issue 3

## Officers

### **President**

Jurgen Weiel

### **Vice President**

Jarred McDaniel

### **Treasurer**

Boyd Carson

### **Secretary**

Dean Center

## Next Meeting

Tuesday,  
December 11

**6:30 pm**

Bozeman High  
Wood Shop

## Topic

5 Station Hands-On!

See Note below,  
bring turning tools

## Minutes of the last Meeting

The meeting was called to order at 7 pm by President Jurgen Weiel. We had many guests, including Randall Wolter, Greg Roberts, Justin Allred, and JAE Anderson.

### Treasurer's Report

Boyd said we have \$2234 in the bank after collecting more dues and a small amount from the raffle.

### Old Business

HandMADE MT Craft Fair. Consensus was that our participation was worthwhile, and several of tonight's guests are here due to the show.

Demos—December will be a Hands On, with 3 stations: spindle, bowl, and hollow form. Jurgen will arrange coaches for the stations and wood.  
January will be Tom Robinson demonstrating how to turn a natural edge bowl.

### New Business

After discussion on our meeting time, there was strong support for moving the start to 6:30. This should allow more time for the presentation, and for socializing, and still allow us to clear out of the shop by 8:30. We will begin with the December meeting.

There was a raffle, but the treasure box is getting low. We are reassessing what to do with the raffle going forward.

Show and Tell was excellent, once again. Here's a particularly unique piece--

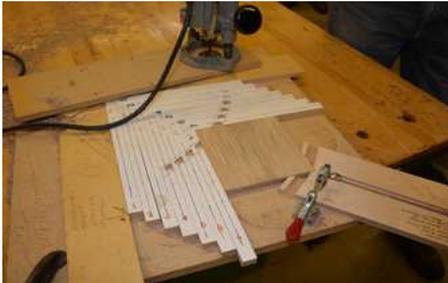

## Announcements

**Oregon Woodturning Symposium**, March 15-17, Albany, OR. Demonstrators include: Sam Angelo, Jimmy Clewes, Cynthia Gibson, Michael Hosaluk, Art Liestman, Glenn Lucas, Richard Raffan, Seri Robinson, Jim Rodgers, Curtis Seebeck, Dave Schweitzer. ([oregonwoodturningsymposium.com](http://oregonwoodturningsymposium.com))

## Demonstration

Bob Taylor gave an updated demonstration on making trivets. He presented a new pivoting jig he has developed which allows him to make curved grooves. He brought a box of prepped wood blanks and everyone who wanted to try it out was able to do so. The demo was well prepared and presented, and so was focused, relatively brief and very well received. Thank you, Bob!

## December Hands On

**For our December presentation, we will have a Hands On, with three (5!) stations.**

This will allow everyone who wants to try something out to have a turn, and possibly several turns. It will also allow everyone to select just what they want to work on.

The stations will be:

- Spindle turning (novice and intermediate)
- Bowl turning (novice and intermediate)
- Hollowing

Bring your favorite tool, or the tool that gives you the most trouble. Consider what aspect of turning is currently giving you the most trouble and that's what the coaches will work on with you. Complete beginners welcome!

## More from Show and Tell
